EDUCATION

2026-Present Health Policy PhD (economics track) at **Harvard University**
Fall 2024 Real Analysis at **Harvard Extension School** (GPA: 4.0)
2020-2024 BA, Economics & Political Science at **University of Maryland, Baltimore County** (GPA: 4.0)

RESEARCH EXPERIENCE

Research Assistant, Federal Reserve Board June 2024 - August 2026

- Worked with Board economists on a variety of research projects, including making regression outputs in Stata and LaTeX for a *QJE* revision on insurance pricing of flood risk; writing algorithms in R to identify bank lending to municipalities in supervisory data; coding Monte Carlo simulations in R for a paper studying the effect of standardized test question responses on life outcomes; linking firms and banks involved in loans to asset managers that hold them; and extracting financial data from PDFs using an LLM API in Python
- Assisted with a variety of Board policy work in the Flow of Funds section, including the pensions and insurance sectors of the Z.1 Financial Accounts; Quantitative Surveillance rounds; pre-FOMC Tealbook charts; rewriting policy products into LaTeX; and ad hoc briefings
- Submitted an NSF GRFP research proposal on Affordable Care Act state reinsurance programs
- Co-taught AP Macroeconomics at Banneker High School for the 2025-26 school year

Research Assistant, Hilltop Institute October 2022 - May 2024

- Collected thousands of newly public hospital price transparency datasets across 31 states
- Cleaned hospital data files in Stata and SAS; wrote an algorithm to standardize insurer names
- Wrote a research brief examining how market concentration affects hospital pricing
- Designed graphics for publication on Hilltop's website

Economic Research Intern, Federal Reserve Board June - August 2023

- Assisted Board economists with data cleaning and robustness checks in Stata and Matlab for research projects
- Collected data for 35 countries, using a variety of data sources, to help Board economists design an international nowcasting model in R
- Worked with the Y-14 corporate loan dataset: cleaning, merging, and using for model testing in Stata

Research Assistant, Leadership Alliance June - August 2022

- Wrote and presented a research paper on the impacts of the Affordable Care Act's individual mandate
- Collected and cleaned data in Stata for a paper on discrimination in economics under Dr. Pietro Veronesi

PROGRAMMING LANGUAGES

Advanced: R, Stata, LaTeX; Intermediate: Python, SQL, Markdown

AWARDS

iOme Challenge Winner Led a team to victory in the 2024 iOme Retirement Policy Challenge, where we submitted a paper on improving US retirement policy

Pittman Scholarship UMBC award for exemplary students studying economics and political science

URA Scholarship UMBC award for students conducting individual, guided, research
